

# Time and Temperature Monitoring Solutions

## What we do

Timestrip is an agile technology business that designs and manufactures time and temperature indicators.

Timestrip Enabled™ products drive changes in supply chain standard operating procedures and consumer behaviour, which in turn leads to greater brand loyalty, a better rate of sale and a built-in value added proposition to products carrying our mark of innovation.

## Stocked Solutions

Innovation remains a core strand of our approach to solution development and the practical application of our patented, low-cost smart label indicators.

## Custom Solutions

Our customisation capabilities open up endless possibilities for product design integration to create solutions where our fail safe indicators replace the need for expensive and unstable electronic components.

We have the capability to print batch numbers or serial numbers onto individual indicators, to make time and temperature monitoring an integral part of Standard Operating Procedures.

## How it Works

Our indicators are activated by applying finger pressure to a blister filled with liquid dye. The temperature indicators show you the product is "ON" after activation. Once a temperature threshold is breached, the indicator window fills with dye, showing the cumulative time the indicator was exposed to high temperatures.

### For Use in

- Blood Banks
- Clinics
- Medical Devices
- Medical Testing
- Pharmaceuticals
- Vaccinations
- Veterinary

Time indicators show you the amount of time since activation. After finger activation, the indicator window continually fills with dye to show you elapsed time.

## Temperature Monitoring

Inert until activated, irreversible threshold indicators.

### Timestrip® PLUS

Monitoring a range of ascending temperature thresholds from -20°C to 38°C.

### Timestrip® PLUS Duo

Monitoring 10°C and 34°C simultaneously.

### Timestrip® Complete Card

2 - 8°C cold chain monitoring on one card.

### Timestrip® Blood Temp

Monitoring 6°C and 10°C. Our 10°C indicator has FDA 510(k) #BK150289 certification.

### Timestrip® Food Temp

3°C, 5°C, 8°C & 10°C indicators for the food industry.

## Time Monitoring

Activate and see time passing with a Timestrip®. Our range of 9 indicators include 15 time lapse markers.

### Short Time Indicators

from 1 Hour to 7 Days, our short time indicators are perfect for medical testing.

### Time Indicators

from 1 to 24 Months, our standard line of time indicators are used in medical devices, for product replacement cycles, with consumables, for appointment reminders, cosmetics, industrial filters and on promotional materials.

Custom indicators can be created with a unique monitoring time and your own branding.
